## CCTV for any situation

Blue Sky Technologies knowledge and experience means the CCTV systems we supply are based on tried and tested technologies, making them robust and with high levels of reliability. This means we are able to seamlessly integrate CCTV, wireless and mobile communications and technologies to provide an efficient and cost-effective CCTV solution.

Blue Sky Technologies offers a comprehensive range of digital video recorders (DVR). These cover all mobile CCTV requirements from covert to entry-level two and four camera CCTV

**Five high quality DVRs recording sixteen cameras each**

through to high end specification, full video, 16 camera DVRs. Images are captured by high quality cameras protected by vandal-proof covers.

With configurable recording rates from 3 fps to full video (25 fps) across all cameras, the CCTV systems feature high capacity hard disk and SD memory cards to capture high resolution images.

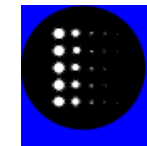

The software we use for our CCTV systems is extremely easy to use. The software is user friendly, fast and reliable. Our systems will give you thirty days standard recording but can be increased greatly if required

No request is too large or small, with our technical advice we can help to plan out the best and most cost effective solution for your needs.

If you have any queries, please don't hesitate to contact us by phone or e-mail and one of our team will be glad to help in any way they can.
