## The Modern & Reliable way to secure your workplace

Card Reader, Exit Button & Magnet for Securing a Door.

The best way to secure your workplace with no key locks is by a swipe card or token, the physical locking of doors becomes obsolete with a very simple system that can be controlled from your desk top with the aid of a Card Reader and you will have full control over who comes and goes where within the facility.

The fitting of a magnet is what will secure the doors, and those doors can have a button to exit if access rights are only needed on entry; say to an office.

What is Access control?

Paxton Reader & Token

Access control is quite literally about controlling access to your premises, or a specific area of your premises.

Instead of the old lock and key method, access control secures your building electronically.

With tokens and readers instead of locks and keys; you say who has access, when and what area's they can have access too.
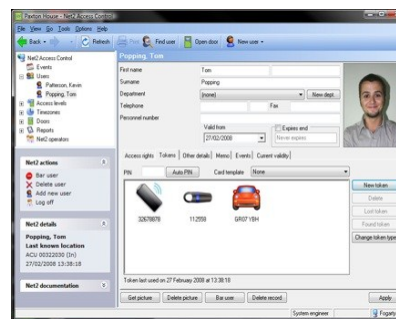

Its simple, modern and very easy to control.

Blue Sky Technologies experience in access control ensures that, whatever the customers requirements, you will always get the best package.

We understand that Access Control does not need to be complicated. Our Access Control systems look professional but are also really easy to use, Paxton systems are so user friendly; they require minimal training to run and are designed to make life as easy as possible for you. They are so convenient, you will wonder why you ever used anything else before.

PC Based Access Control

• All doors are controlled directly from one or more PC's

• You can instantly update user access levels at the PC

• Set up Zones for areas that only certain users have access to

• Pinpoint where staff members and visitors are in the building

• Monitor staff working hours

Being able to manage the system from your desk is a major benefit of using an access control system with the

Paxton Software

PC Software. This convenient tool will make your job so much easier, you can update access permissions at the click of a button.

Paxton Net 2 key Features

- PC Based control

- Instant updates

- Monitor staff working hours

- Timesheets

- Restrict areas to specific users at specific times

- Pinpoint where staff members are

- Monitor access events as they happen.

We use Paxton Net 2 software and Paxton door controllers for our Access Control Systems, this is ideal for almost all Installations as it is controlled and manageable over a network and is proven simple to use.
